

ABDUL MOHID KASHIF

Aspiring Cybersecurity Analyst

Karachi, Pakistan | +92 334-3397828 | mohidkashif1624@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Entry-level cybersecurity candidate building foundational skills in network security, system monitoring, and incident response. Completed a Deloitte Australia Cyber Job Simulation and currently working through Cisco Networking Academy's Introduction to Cybersecurity course. Background in computer engineering coursework with strong analytical thinking, attention to detail, and clear communication. Actively developing hands-on experience through self-directed labs and documented practice, seeking an entry-level SOC or cybersecurity analyst role or internship.

EDUCATION

BS in Computer Engineering

Sir Syed University of Engineering & Technology

2024 – 2028 (In Progress)

Intermediate

College for Advanced Studies

2021 – 2023

CERTIFICATIONS & TRAINING

Deloitte Australia Cyber Job Simulation

Forage

Completed — July 22, 2026

- Completed a job simulation involving reading web activity logs
- Supported a client in a cyber security breach
- Answered questions to identify suspicious user activity

Introduction to Cybersecurity

Cisco Networking Academy

In Progress

Basics of Python (CR641)

UniAthena × Cambridge International Qualifications, UK — Score: 96/100, Pass

Completed — July 25, 2026

Google Cybersecurity Professional Certificate

Coursera — paused due to a premium/license access issue

Paused

TECHNICAL SKILLS (IN DEVELOPMENT)

- Security Fundamentals: CIA triad, security frameworks, risk and threat identification
- Networking: TCP/IP, network protocols, firewalls, VPNs
- Operating Systems: Linux command line, Windows security basics
- Tools & Languages: Python (scripting basics), SQL, SIEM concepts (Splunk)
- Practices: Log analysis, vulnerability identification, incident response fundamentals

PROJECTS

Full write-ups and progress tracked on personal portfolio site (mktechlab30.github.io)

- Home Lab Setup — building a virtual network environment to practice traffic monitoring and log analysis (in progress)
- Phishing Email Analysis — breaking down email headers and indicators to identify phishing attempts (in progress)
- TryHackMe Write-ups — documenting methodology and findings from guided security exercises (in progress)

SOFT SKILLS

- Clear written and verbal communication
- Analytical problem-solving and attention to detail
- Time management and reliable follow-through
- Comfortable working independently and learning new technical tools quickly

LANGUAGES

English (Fluent) • Urdu (Native)
